

Parents: This is Urgent:

We need your help and cooperation. Please keep in mind that it's critical for you to help the school and to keep your child home when they are sick. If they have COVID symptoms you should also keep any household members home. Please report your child's absence and all symptoms to the school offices when they will miss school. If you, your child or a household member is tested for COVID, each family member needs to stay home until you get the results. Once you get the results, please be sure to send the results to the school offices. Your child can not return to school until the office receives the results. (Please do not send results to teachers). We, also, need to stress that when you are given a return date from the Nurse's office or the Department of Health, you will need to follow that information and will not be able to send your child back to school earlier. If you have questions about return dates, please contact the school nurse. With the increase of COVID cases in our county it is so important that you remain diligent in helping our school and our community be safe.

The Decision Tree is on our school website, please use this as a guideline if you are not sure what to do. You may also call the school nurse, Laurie at 507-794-7903, ext 1300, or myself at 507-794-7904, ext 1409 and we can assist you if you are not sure. We'd rather have you keep your child/ren home as a precaution then send them, only to find out they need to go back home. We appreciate your understanding and cooperation. Let's help keep our school as safe and healthy as we can.

Mr. Cselovszki
